HOUSE RESOLUTION 1259

Offered by Representative Scully:

WHEREAS, Constable James Quinn died in the line of duty on December 5, 1853, having succumbed to serious injuries sustained while discharging his duties as both a constable and an early member of the municipal police force in Chicago; and

WHEREAS, Having sustained a broken rib and an injured jaw in the first attack and having been thrown to the ground and kicked several times resulting in fractured ribs and a punctured lung during a second attack, Constable Quinn continued to pursue an escaped prisoner; and

WHEREAS, On the two days preceding his death, Constable Quinn continued to report for duty, finally causing the capture of both his escaped prisoner, as well as the tavern owner, William Rees, who beat him on both occasions; and

WHEREAS, Constable Quinn's condition deteriorated resulting in a congestion of the brain, and he finally died from injuries sustained in the line of duty; and

WHEREAS, Following the death of Constable James Quinn, the Chicago Common Council Committee on Police found on December 12, 1853, that "an officer had been recently killed in the discharge of his duty" and the entire Chicago Police Force was ordered to descend on the North Division vice district to rout out crime and "Vindicate the Honor of the Police"; and

WHEREAS, Following the conviction of Constable Quinn's killer, William Rees, the Chicago Common Council awarded his wife, Margaret Quinn, benefits as the result of his death in the line of duty; and

WHEREAS, On February 27, 1854, the Chicago Common Council noted in its official proceedings that Constable "James Quinn was deprived of life and his helpless family bereaved of their sole support and protection under no ordinary circumstances, but in the honest and faithful discharge of his duty as an officer of the city"; and

WHEREAS, The circumstances surrounding the death of Constable James Quinn and the trial and conviction of the perpetrator of his death, William Rees, has been reported with historical documentation in the Chicago Evening Journal, Chicago Republican, Daily Democratic Press, and Chicago Tribune; and

WHEREAS, During the proceedings of the trial against Constable Quinn's assailant, one William Rees, testimony concerning the injuries that caused Constable Quinn's death were substantiated by two well-known Chicago medical persons, Dr. Herrick and Dr. Henrotin; and

WHEREAS, William Rees was convicted of the death of Constable Quinn, as set forth on the one-count indictment, that "James Quinn came to his death from an assault made by William Rees on the second day of December last"; and

WHEREAS, Judge Robert S. Wilson of the Recorder's Court sentenced William Rees to five years in the penitentiary at Alton; and

WHEREAS, The testimony of Constable Quinn's widow moved the members of the Chicago Common Council on February 27, 1854, to recognize Constable Quinn's service and sacrifice to the people of Chicago; and

WHEREAS, On March 6, 1854, the Chicago City Council's Committee on Judiciary concurred favorable with the Widow Quinn's petition authorizing her compensation for her husband's death in the line of duty as a constable; and

WHEREAS, Common sense tells us that the conviction of Rees and this payment to a fallen officer's widow proves a prima facie line of duty death in the case of Constable Quinn and establishes Margaret Quinn as the first Line of Duty death widow in Chicago history; and

WHEREAS, Historical evidence attests that this was the first such payment to a fallen officer's widow in the City of Chicago; and

WHEREAS, One hundred fifty-three years have elapsed since the death in the line of the duty of Constable James Quinn; and

WHEREAS, The addition of substantive historical scholarship and documentation, provided by the

research and analysis of former DEA Agent Richard Barrett, has expanded the knowledge and understanding of Constable James Quinn's sacrifice on behalf of the people of Chicago; and

WHEREAS, With the passage of time and the obscuring of memory, the Chicago Police Department has not accorded Constable James Quinn with the official distinction of an officer killed in the line of duty; therefore, be it

RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE NINETY-FOURTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that we encourage the Chicago Police Department to resolve the accidents of history and accord Constable James Quinn all the rights and honors of a fallen officer killed in the line of duty by listing him in all official records as the first Chicago Policeman killed in the line of duty, and to include a badge representing Constable James Quinn's service in the Honored Star Case at Police Headquarters, and to include his name on the municipal memorial under construction honoring those heroes of Chicago law enforcement; and be it further

RESOLVED, That we encourage the Chicago Police Department to authorize the National Law Enforcement Officer's Memorial in Washington, D.C., of Constable James Quinn's inclusion in the roll of Chicago Police Officers killed in the line of duty; and be it further

RESOLVED, That a suitable copy of this resolution be presented to the Superintendent of Chicago Police, Philip J. Cline, and members of the Chicago Police Department Awards Committee.

HOUSE RESOLUTION 1265

HOUSE JOINT RESOLUTION 130

Offered by Representative Howard:

WHEREAS, America's increasing dependence on foreign oil has contributed to rising gasoline prices throughout Illinois and the nation; numerous economic development and environmental benefits result from the use of renewable fuels, including strengthening our agricultural sector by creating new renewable

fuels industry related jobs, reducing our dependence on foreign oil, improving our energy security, and reducing greenhouse gas emissions; and

WHEREAS, Replacing fossil fuels with renewable raw material significantly reduces the consumption of limited energy sources; the hybrid grass miscanthus requires little energy input for infrastructure, fertilizers and pesticides, and growing and processing; use of non-renewable raw materials in miscanthus production and processing is limited to infrastructure and transport; miscanthus requires significantly less fertilizer and pesticide input than other energy crops; miscanthus is a plant that thrives on less water than other crops; targeted below-ground irrigation via pipe systems increases yields; and

WHEREAS, Mining fossil fuels entails large-scale interference in the landscape, but establishing energy crops preserves rather than endangers landscapes; miscanthus has the best energy per space ratio of all energy crops; harvested miscanthus can be processed down to the last fibre, leaving no production waste; ashes from combustion can re-enter the cycle as fertilizer; and

WHEREAS, Renewable energy sources have a closed carbon cycle: the CO₂ released while burning biomass is absorbed by the next crop growing; in contrast to fossil fuels like coal, petroleum, and natural gas, the atmosphere is not polluted by additional greenhouse gas and CO₂ emissions; the danger of water pollution by excessive fertilization is low; compared to food production the pesticide input is extremely low, and miscanthus requires pesticide input only during the first and second year of establishment to keep out competing field plants; so far, no significant pests or diseases have affected miscanthus; and

WHEREAS, The energy yield from miscanthus is not high enough to make transportation over long distances economically viable, favoring localized conversion and use at the place of availability and the establishment of local infrastructure; growing miscanthus has some advantages over conventional food agriculture; perennials offer more animal and plant kinds a habitat than a crop like corn could; the soil improves, and as miscanthus requires only a low fertilizer input, the danger of water pollution is low; miscanthus stabilizes soil threatened by erosion; fields planted with miscanthus produce annual yields over decades without harming the natural balance of soil and ground water; and

WHEREAS, Growing and converting miscanthus as an energy crop is highly cost-effective; the conversion of biomass to biogenic solid fuels is labor-intensive and creates jobs; growing miscanthus offers farmers an additional foothold; new employment opportunities benefit economically weak areas; miscanthus can be harvested with existing machinery; biomass fuels are easy to store, even for longer periods of time, which ensures year-round availability; up-to-date conversion facilities pose no health risks; appropriate handling will prevent the development of hazardous fungus spores or toxins that is possible in biofuel storage; and

WHEREAS, Dry miscanthus stems can be used as a solid fuel; the perennial grass grows from an underground stem-like organ called a rhizome; miscanthus, a crop native to Asia and a relative of sugarcane, drops its leaves in the winter, leaving behind tall bamboo-like stems that can be harvested in early spring and burned for fuel; grasses such as miscanthus are very clean fuels; nutrients such as nitrogen are transferred to the rhizome and are saved until the next growing season; burning miscanthus produces only as much carbon dioxide as it removes from the air as it grows, that balance means there is no net effect on atmospheric carbon dioxide levels, which is not the case with fossil fuels; and

WHEREAS, Miscanthus also is a very efficient fuel, because the energy ratio of input to output is less than 0.2; in contrast, the ratios exceed 0.8 for ethanol and biodiesel from canola, which are other plant-derived energy sources; besides being a clean, efficient, and renewable fuel source, miscanthus also is remarkably easy to grow; upon reaching maturity, miscanthus has few needs, as it outgrows weeds, requires little water and minimal fertilizer, and thrives in untilled fields; in untilled fields, various wildlife species make their homes in the plant's leafy canopy and in the surrounding undisturbed soil; Illinois researchers have found that miscanthus grown in the State has greater crop yields than in Europe, where it has been used commercially for years; full-grown plants produce 10-30 tons per acre dry weight each year; and

WHEREAS, The Illinois miscanthus crop began three years ago, when 400 miscanthus rhizomes were planted at the University of Illinois, and the three 33-by-33 feet miscanthus plots are considered mature; nine different fields across the State are being used to help estimate miscanthus productivity; plots in Champaign and Christian counties each have more than 2 acres of miscanthus, and DeKalb, Pike, Pope, Wayne, Fayette, and Mason counties have smaller plots; plots in Champaign County have shown the greatest yearly yields, according to the 2004 progress report to the Illinois Council on Food and Agricultural Research, which funded the experiments; and

WHEREAS, The next step is to demonstrate how miscanthus goes from a plant to a power source; existing U.S. power plants could be modified to use miscanthus for fuel, as in Europe; therefore, be it

RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE NINETY-FOURTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, THE SENATE CONCURRING HEREIN, that we urge the United States Department of Agriculture and the Illinois Department of Agriculture to fund research and make grants available to determine the efficacy of using miscanthus as a power source; and be it further

RESOLVED, That suitable copies of this resolution be delivered to the United States Secretary of Agriculture and to the Illinois Director of Agriculture.

AMENDMENT NO. 2. Amend Senate Bill 2872 by replacing everything after the enacting clause with the following:

"Section 1. Short title. This Act may be cited as the Local Government Facility Lease Act.

Section 5. Definitions. As used in this Act:

"Facility property" means property owned by a municipality with a population of over 500,000 inhabitants, or a unit of local government whose jurisdiction includes territory located in whole or in part within a municipality with a population of over 500,000 inhabitants, that is used by the municipality or other unit of local government for the purpose of an airport, parking, or waste disposal or processing. "Airport", however, does not include any airport property, as defined under Section 10 of the O'Hare Modernization Act.

"Leased facility property" means facility property that is leased to a private entity for continued use for the same airport, parking, or waste disposal or processing purpose.

Section 10. Compliance with applicable ordinances. Each party to whom facility property is leased shall comply with all applicable ordinances of the municipality in which the property is located governing contracting with minority-owned and women-owned businesses and prohibiting discrimination and requiring appropriate affirmative action, to the extent permitted by law and federal funding restrictions, as if the party to whom the property is leased were that municipality.

Section 15. Limitation on the expansion of airport property. Chicago Midway International Airport is facility property used for airport purposes under this Act. No runway of Chicago Midway International Airport shall be expanded beyond the territory bounded by 55th Street on the north, Cicero Avenue on the east, 63rd Street on the south, and Central Avenue on the west, as those avenues and streets are situated on the effective date of this Act.

Section 20. Use of lease proceeds by lessor.

(a) With respect to any leased facility property used for airport purposes, at least 90% of the net proceeds of the lease shall be expended or obligated by the lessor municipality for:

- (i) the construction and maintenance of infrastructure within the municipality;
- (ii) contributions to pension funds created for municipal employees; or
- (iii) any combination of (i) or (ii).

(b) The amount of net proceeds expended or obligated for item (ii) in subsection (a) may not exceed the amount of net proceeds expended or obligated for item (i) in subsection (a). As used in this Section, "net proceeds" means the gross proceeds less any debt service payments on, and payments to retire, debt that is specifically associated with the leased facility property or otherwise required to be paid out of lease proceeds.

Section 25. Project labor agreements for projects funded by airport lease proceeds. With respect to the construction of public works funded by the proceeds described in Section 20, where the project has an estimated contract value of \$500,000 or more, where there has been a written determination that the public interest in cost, timely and orderly construction, labor stability, and advancement of minority-owned and women-owned businesses and minority and female employment would be served by a project labor agreement, and where not otherwise prohibited by applicable law, the municipality or municipal corporation responsible for implementing the project shall in good faith negotiate a project labor agreement with labor organizations engaged in the construction industry. Any project labor agreement shall:

- (1) set forth effective, immediate, and mutually binding procedures for resolving jurisdictional disputes and grievances arising before completion of work;
- (2) contain guarantees against strikes, lockouts, or similar actions;
- (3) ensure a reliable source of skilled and experienced labor;
- (4) further public policy objectives as to improved employment opportunities for minorities and women in the construction industry to the extent permitted by State and federal law;
- (5) be made binding on all contractors and subcontractors on the public works project through inclusion of appropriate bid specifications in all relevant bid documents; and
- (6) include such other terms as the parties deem appropriate.

Section 30. Labor neutrality and card check procedure agreement at the leased property. With respect to employees assigned to work on the premises of leased facility property used for airport purposes and who are not otherwise members of an existing bargaining unit cognizable under the National Labor Relations Act, and where not otherwise prohibited by applicable law, the lessee shall negotiate in good faith, with any union that seeks to represent its employees, for a labor neutrality and card check procedure agreement. The agreement shall apply only to employees actually assigned to work on the premises of the leased facility

property used for airport purposes and shall have no applicability to employees not so assigned. The agreement shall contain provisions accomplishing the following objectives: resolution by a third party neutral of disagreements regarding bargaining unit scope, inclusions, and exclusions; determination of the existence of majority support for a bargaining agent by means of a card check procedure; employer neutrality; prohibition of coercion or intimidation of employees by either the employer or the union; and a prohibition on strikes, work stoppages, or picketing for the duration of the agreement.

Section 35. Wage requirements. In order to protect the wages, working conditions, and job opportunities of employees employed by the lessee of leased facility property used for airport purposes to perform work on the site of the leased premises previously performed by employees of the lessor on the site of the leased premises and who were in recognized bargaining units at the time of the lease, the lessee, and any subcontractor retained by the lessee to perform such work on the site of the leased premises, shall be required to pay to those employees an amount not less than the economic equivalent of the standard of wages and benefits enjoyed by the lessor's employees who previously performed that work. The lessor shall certify to the lessee the amount of wages and benefits (or their equivalent) as of the time of the lease, and any changes to those amounts as they may occur during the term of the lease. All projects at the leased facility property used for airport purposes shall be considered public works for purposes of the Prevailing Wage Act.

Section 40. Required offers of employment. As part of any transaction to lease facility property that is used for airport purposes:

- (1) the lessee must offer employment, under substantially similar terms and conditions, to the employees of the municipality who are employed, at the time of the lease, with respect to the facility property used for airport purposes; and
- (2) the municipality must offer employment in another department, division, or unit of the municipality, under substantially similar terms and conditions, to employees of the municipality who are employed, at the time of the lease, with respect to the facility property used for airport purposes.

Section 45. Judicial enforcement. The provisions of this Act are judicially enforceable by injunctive relief and an award of actual damages.

Section 50. Home rule preemption; exemption from State Mandates Act.

(a) A home rule unit may not exercise its home rule powers and functions in a manner that is inconsistent with this Act. This subsection is a limitation under subsection (i) of Section 6 of Article VII of the Illinois Constitution on the concurrent exercise by home rule units of powers and functions exercised by the State.

(b) Notwithstanding Sections 6 and 8 of the State Mandates Act, no reimbursement by the State is required for the implementation of any mandate created by this Act.

SENATE BILL 2436. Having been printed, was taken up and read by title a second time.

The following amendment was offered in the Committee on Human Services, adopted and printed:

AMENDMENT NO. 1. Amend Senate Bill 2436 by replacing everything after the enacting clause with the following:

"Section 5. The Illinois Health Facilities Planning Act is amended by changing Sections 12, 13, and 19.6 as follows:

(20 ILCS 3960/12) (from Ch. 111 1/2, par. 1162)

(Section scheduled to be repealed on July 1, 2006)

Sec. 12. Powers and duties of State Board. For purposes of this Act, the State Board shall exercise the following powers and duties:

(1) Prescribe rules, regulations, standards, criteria, procedures or reviews which may vary according to the purpose for which a particular review is being conducted or the type of project reviewed and which are required to carry out the provisions and purposes of this Act.

(2) Adopt procedures for public notice and hearing on all proposed rules, regulations, standards, criteria, and plans required to carry out the provisions of this Act.

(3) Prescribe criteria for recognition for areawide health planning organizations, including, but not limited to, standards for evaluating the scientific bases for judgments on need and procedure for making these determinations.

(4) Develop criteria and standards for health care facilities planning, conduct statewide inventories of health care facilities, maintain an updated inventory on the Department's web site reflecting the most recent bed and service changes and updated need determinations when new census data become available or new need formulae are adopted, and develop health care facility plans which shall be utilized in the review of applications for permit under this Act. Such health facility plans shall be coordinated by the Agency with the health care facility plans areawide health planning organizations and with other pertinent State Plans. Inventories pursuant to this Section of skilled or intermediate care facilities licensed under the Nursing Home Care Act or nursing homes licensed under the Hospital Licensing Act shall be conducted on an annual basis no later than July 1 of each year and shall include among the information requested a list of all services provided by a facility to its residents and to the community at large and differentiate between active and inactive beds.

In developing health care facility plans, the State Board shall consider, but shall not be limited to, the following:

- (a) The size, composition and growth of the population of the area to be served;
- (b) The number of existing and planned facilities offering similar programs;
- (c) The extent of utilization of existing facilities;
- (d) The availability of facilities which may serve as alternatives or substitutes;
- (e) The availability of personnel necessary to the operation of the facility;
- (f) Multi-institutional planning and the establishment of multi-institutional systems where feasible;
- (g) The financial and economic feasibility of proposed construction or modification; and
- (h) In the case of health care facilities established by a religious body or denomination, the needs of the members of such religious body or denomination may be considered to be public need.

The health care facility plans which are developed and adopted in accordance with this Section shall form the basis for the plan of the State to deal most effectively with statewide health needs in regard to health care facilities.

(5) Coordinate with other state agencies having responsibilities affecting health care facilities, including those of licensure and cost reporting.

(6) Solicit, accept, hold and administer on behalf of the State any grants or bequests of money, securities or property for use by the State Board or recognized areawide health planning organizations in the administration of this Act; and enter into contracts consistent with the appropriations for purposes enumerated in this Act.

(7) The State Board shall prescribe, in consultation with the recognized areawide health planning organizations, procedures for review, standards, and criteria which shall be utilized to make periodic areawide reviews and determinations of the appropriateness of any existing health services being rendered by health care facilities subject to the Act. The State Board shall consider recommendations of the areawide health planning organization and the Agency in making its determinations.

(8) Prescribe, in consultation with the recognized areawide health planning organizations, rules, regulations, standards, and criteria for the conduct of an expeditious review of applications for permits for projects of construction or modification of a health care facility, which projects are non-substantive in nature. Such rules shall not abridge the right of areawide health planning organizations to make recommendations on the classification and approval of projects, nor shall such rules prevent the conduct of a public hearing upon the timely request of an interested party. Such reviews shall not exceed 60 days from the date the application is declared to be complete by the Agency.

(9) Prescribe rules, regulations, standards, and criteria pertaining to the granting of permits for construction and modifications which are emergent in nature and must be undertaken immediately to prevent or correct structural deficiencies or hazardous conditions that may harm or injure persons using the facility, as defined in the rules and regulations of the State Board. This procedure is exempt from public

hearing requirements of this Act.

(10) Prescribe rules, regulations, standards and criteria for the conduct of an expeditious review, not exceeding 60 days, of applications for permits for projects to construct or modify health care facilities which are needed for the care and treatment of persons who have acquired immunodeficiency syndrome (AIDS) or related conditions.

(Source: P.A. 93-41, eff. 6-27-03.)

(20 ILCS 3960/13) (from Ch. 111 1/2, par. 1163)

(Section scheduled to be repealed on July 1, 2006)

Sec. 13. Investigation of applications for permits and certificates of recognition. The Agency or the State Board shall make or cause to be made such investigations as it or the State Board deems necessary in connection with an application for a permit or an application for a certificate of recognition, or in connection with a determination of whether or not construction or modification which has been commenced is in accord with the permit issued by the State Board or whether construction or modification has been commenced without a permit having been obtained. The State Board may issue subpoenas duces tecum requiring the production of records and may administer oaths to such witnesses.

Any circuit court of this State, upon the application of the State Board or upon the application of any party to such proceedings, may, in its discretion, compel the attendance of witnesses, the production of books, papers, records, or memoranda and the giving of testimony before the State Board, by a proceeding as for contempt, or otherwise, in the same manner as production of evidence may be compelled before the court.

The State Board shall require all health facilities operating in this State to provide such reasonable reports at such times and containing such information as is needed by it to carry out the purposes and provisions of this Act. Prior to collecting information from health facilities, the State Board shall make reasonable efforts through a public process to consult with health facilities and associations that represent them to determine whether data and information requests will result in useful information for health planning, whether sufficient information is available from other sources, and whether data requested is routinely collected by health facilities and is available without retrospective record review. Data and information requests shall not impose undue paperwork burdens on health care facilities and personnel. Health facilities not complying with this requirement shall be reported to licensing, accrediting, certifying, or payment agencies as being in violation of State law. Health care facilities and other parties at interest shall have reasonable access, under rules established by the State Board, to all planning information submitted in accord with this Act pertaining to their area.

Among the reports to be required by the State Board are facility questionnaires for health care facilities licensed under the Ambulatory Surgical Treatment Center Act, the Hospital Licensing Act, the Nursing Home Care Act, or the End Stage Renal Disease Facility Act. These questionnaires shall be conducted on an annual basis and compiled by the Agency. For health care facilities licensed under the Nursing Home Care Act, these reports shall include, but not be limited to, the identification of specialty services provided by the facility to patients, residents, and the community at large. For health care facilities that contain long term care beds, the reports shall also include the number of staffed long term care beds, physical capacity for long term care beds at the facility, and long term care beds available for immediate occupancy. For purposes of this paragraph, "long term care beds" means beds (i) licensed under the Nursing Home Care Act or (ii) licensed under the Hospital Licensing Act and certified as skilled nursing or nursing facility beds under Medicaid or Medicare.
